12	Mining	Effects of Blasting - Minimising Impact Standard V1.0	Standard	Approved	Abel Moetj	Rossouw Snyders	T5-MIN-S-0001	2025-06-30	Willem Hamse	2025-03-07	

Centralized Storage:

All documents are stored in a single, structured system, reducing duplication and loss.

Version Management:

Automatically tracks document versions to ensure only the latest approved versions are accessed.

Accessibility:

Allows users to quickly locate documents using keywords, categories, or historical usage.

Review & Approval Mechanisms:

Built-in workflows route documents through review and approval steps in an efficient, structured manner.

Digital Sign Off:

Digital signatures and automated notifications simplify approvals.
The functionality to incorporate automated sign off is still in development.

Document Status Management:

Flags documents due for review or removal to maintain compliance.

Mobile Access:

A dedicated Android app enables field staff to access essential documents while on-site, ensuring that critical operational procedures and forms are always within reach.
